A person stands with arms raised in a dark landscape under a vibrant aurora borealis. The sky is a mix of deep blue, purple, and green, with a starry background. The aurora displays bright green and yellow-green bands. The foreground shows a dark, flat landscape with distant mountains. The overall mood is awe and wonder.

We are as diverse as we are dynamic  
As curious as we are clever

## *Why Aurecon?*

Our industry is changing. We must change too.

We believe for a brand to be resilient, it must speak to the truths of the organisation and its people.

### **FIVE TRUTHS** about Aurecon:

1. We draw on diversity in people to frame complex problems
2. Our eminent practitioners collaborate to solve challenging problems
3. We use digital insights to enhance physical assets
4. Our engineering design is human-centred
5. We consider our clients' clients in the work we do

## Integrated transport & mobility

Our global team comprises a blend of transport planning and ITS experts that specialise in multiple areas including:

- Strategic transport planning and mass transit planning
- Traffic engineering
- Intersection redesign
- Strategic: micro-sim and pedestrian modelling
- Data analysis
- ITS design
- Strategic operations and Con Ops
- Business case development
- Safety Systems & Auditing
- SCATS support
- Traffic signal software

# Quality

When engineers get it wrong, the consequences can be dire. We are acutely aware of our professional responsibility to create technical solutions which are both safe and sound.

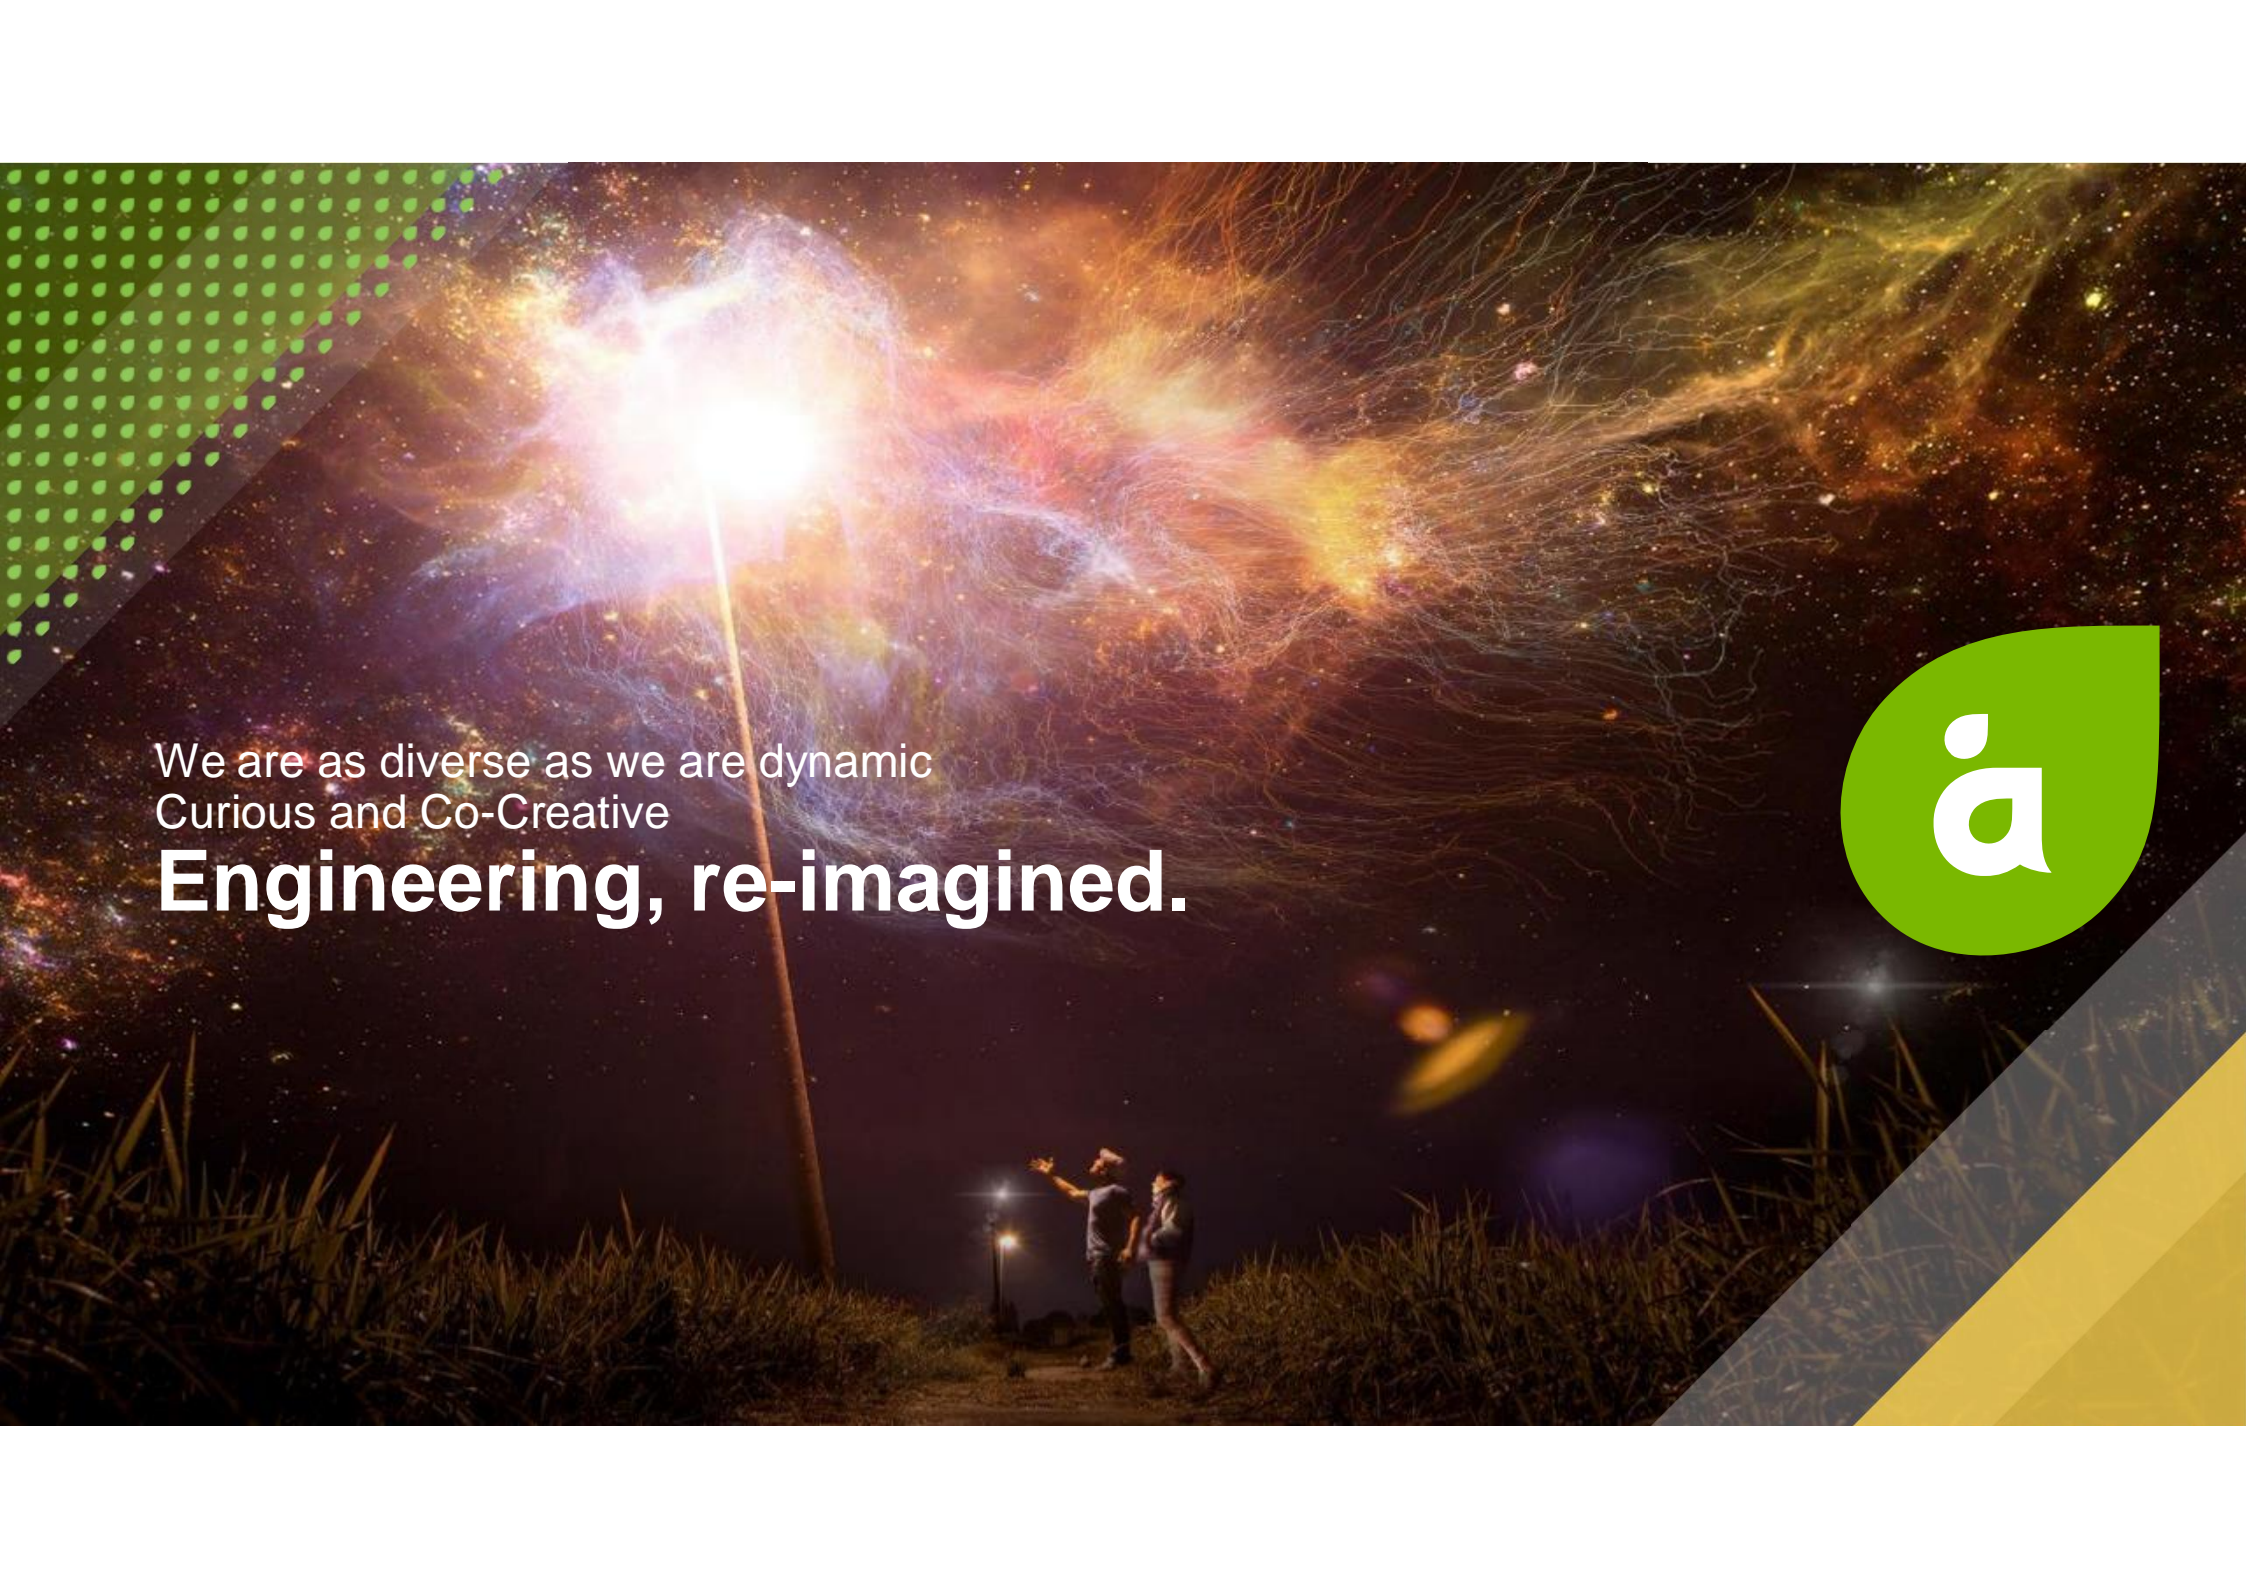

# Modern Micro Mobility

We are as diverse as we are dynamic  
Curious and Co-Creative
